Building Efficiency Survey

- 50 % of the energy imported into a building is wasted, 25% can be saved through technology and a further 25% can be saved through behaviour change.
- Installed smart monitoring of individual electricity circuits.
- Carried out review of building M&E and building fabric.
- Reviewed staff behaviour with regards to energy usage
- Holistic approach to building efficiency with a focus on cost saving
- Focussed on small wins, simple plans and visibility of big projects
- Survey laid out cost vs benefit and ROI
- All information passed to client and follow up action agreed
